HMS DAP

REWINDABLE SUBMERSIBLE MOTORS

REWINDABLE SUBMERSIBLE MOTORS

DAP SERIES

DAP is a new series of asynchronous submersible rewindable motors designed and manufactured by Livnynasos (HMS Group's division in Livny, Russia).

APPLICATION

The motor is rigidly coupled with a submersible borehole pump forming a pumping unit applicable for the underground water intake facilities, booster modules, water level lowering, fountains, etc.

WARRANTY

The DAP series motors are covered with a three (3) year warranty. It is highly recommended to connect the borehole pumping unit to the power supply via HMS Control series control panel or similar control & protection units.

RELIABILITY

- Motor's inner chamber is insulated from pumped water that prevents sand ingress into the bearings and corrosion, resulting in increased service life
- High efficiency through entire service life

TECHNICAL DATA

Diameter range, inches 6, 8, 10
 Power range..... up to 130 kW
 Rotation speed.....3000 rpm
 Rated voltage..... 50 Hz, 3-phase, 380/400 V
 Min. cooling flow-rate0.2 m/sec

MOTOR TYPE KEY

POWER SUPPLY CONNECTION

DOL (Direct On-Line)

FEATURES, ADVANTAGES, BENEFITS

- Motor is filled with a liquid allowing contact with potable water
- Motor storage temperature: -30...+60 °C (-22...140 F)
- Lack of the liquid can be refilled with clean water (at storage temperature above +4 °C)
- Vertical and horizontal installation are equally possible (e.g. booster modules)
- Flanges and shafts are made in accordance with appropriate NEMA standards
- Resistance to unstable voltage
- Casing made of AISI 316 stainless steel*
- Sand guard for mechanical seal protection from the solid particles
- Rotor's "squirrel cage" is made of copper for increased efficiency
- High-temperature rewindable winding with PE2/PA insulation (up to 100 °C); temperature sensor is optionally available for overheating protection
- Radial bearings of composite materials with spiral grooves for better lubrication
- Heavy duty self-aligning water lubricated thrust bearing
- Counter thrust bearing for the rotor upward movement prevention
- Reliable mechanical seal from the world's leading manufacturers
- Rubber diaphragm for the liquid expansion compensation

1. NEMA flange
2. Sand guard
3. Mechanical seal
4. Radial bearing
5. Squirrel cage made of copper
6. Rotor shaft made of AISI 409 stainless steel
7. PE2/PA winding is standard
8. Counter thrust bearing
9. Self-aligning thrust bearing
10. Cast Iron bottom part
11. Rubber diaphragm

* The bottom casing part is made of cast iron with powder coating.

TECHNICAL DATA

Parameters	DAP 6 series	DAP 8 series	DAP 10 series
Max diameter (D), mm	144	189	235
Protection	IP68		
Starts per hour	≤ 20		
Water temperature	up to +30 °C (86 °F)		
Voltage	50 Hz, 3 x 400 V		
Voltage tolerance	-15 ... +10%		
Synchronous rotation speed, rpm	3000		

PE2/PA winding insulation, up to 100 °C temperature resistance

DAP 6

DAP 8

DAP 10
