SIDUS. SUBMERSIBLE SEWAGE PUMPS

GENERAL DESCRIPTION

Application	2
Technical Data	2
Pump Protection.....	2
Features & Advantages	3
Mounting Methods.....	3
Pump Series Designation	4
Electric cables application depending on the electric motors power	4
Pump Type 2A.....	5
Pump Type 2C	8
Pump Types 4C, 6C, 8C.....	14
— Types 4C, 6C. Pumps with discharge nozzle diameter up to 125 mm.....	16
— Type 4C. Pumps with discharge nozzle diameter 150 – 250 mm.....	26
— Type 6C. Pumps with discharge nozzle diameter 150 – 250 mm.....	34
— Types 4C, 6C, 8C. Pumps with discharge nozzle diameter over 300 mm	42
Pump Type 2VT, 4VT	47
Pump Type 4OG, 6OG	60
HMS GROUP	68

SIDUS. SUBMERSIBLE SEWAGE PUMPS

The submersible sewage pumps of the Sidus series are designed for handling sewage and waste water as well as other non-aggressive fluids with density up to 1,250 kg/m³, pH value within the range of 5 – 12, with high content of solid particles of up to 160 mm size and long-fiber inclusions.

The pump is a monoblock unit consisting of a single-stage pump connected to a sealed electric motor separated by an oil chamber with a mechanical seal.

PUMP PROTECTION

- Bimetal sensors for electric motors winding temperature control
- Sensor for water ingress into the oil chamber
- Bearings temperature sensors (optional, available by request)

APPLICATION

- Handling sewage water at industrial facilities and residential areas
- Flood and storm water drainage
- Handling drainage and sanitary sewage of underground facilities
- Drainage of foundation pits and trenches in industrial and civil construction
- Groundwater removal and drainage in agriculture
- Dewatering and drainage systems in mining industry
- Drainage of pits, septic tanks, sumps, reservoirs
- Regulation of water level in storage tanks, ponds
- Drainage of ponds, pools and cisterns

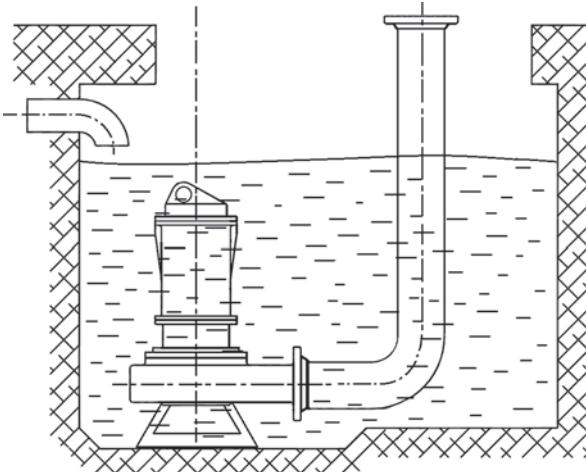

TECHNICAL DATA

Capacity range	8 – 2,500 m ³ /h
Pressure head range	7 – 80 m
Max pumped fluid temperature	+ 80 °C
Pumped solids size	up to 160 mm
Rotation speed	750 – 3,000 rpm
Ingress protection code	IP68
Discharge nozzles diameters range	40 – 400 mm
Impeller types	<ul style="list-style-type: none"> ■ semi open ■ channel (single-blade, multi-blade) ■ free-vortex ■ semi-open rubberized
Impeller construction material	<ul style="list-style-type: none"> ■ grey cast iron ■ nodular cast iron ■ stainless steel ■ duplex steel (25% chromium) ■ rubberized grey cast iron
Shaft sealing	double mechanical
Mechanical seal friction materials	silicon carbide / silicon carbide

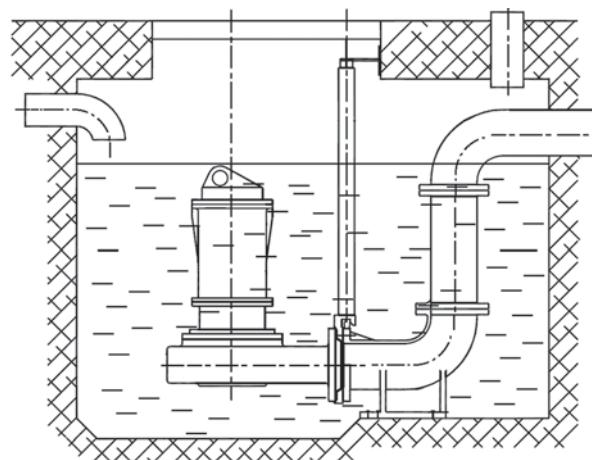

FEATURES & ADVANTAGES

- Submersible sewage pumps can be installed directly in the reservoir with the liquid to be pumped (in case of «wet» installation) or in the machinery hall of the pumping station (in case of «dry» installation). In the latter case, even if the machinery hall is flooded, the pumps can continue operation in the flooded area of the station
- The pumps have a monoblock design with a impeller mounted directly on the motor shaft that eliminates the need for a coupling and additional alignment of the both shafts. Factory alignment is ensured by precision manufacturing and assembly of parts and is maintained throughout the entire service life. Submersible monoblock pumps require virtually no maintenance
- The mechanical seals are placed in the oil chamber that prevents their damage when the pump is started in a «dry running» mode (without fluid in the flow path)
- The submersible pumps have a much lower noise level compared to surface pumps due to their placement in the pumped fluid that absorbs the sound or due to the sound absorption by the fluid in the motor cooling jacket at the pump «dry» installation
- The motor when submerged is cooled by the fluid being pumped and, in the dry installation, by the fluid circulating in the cooling jacket that provides more efficient cooling of the motor than by the air cooling fan
- The pumps are equipped with a lifting device with automatic pipe couplings for fast lifting and submerging into the reservoirs without additional tools
- The pumps are supplied with power supply cables designed for application in water with high content of solid mechanical impurities

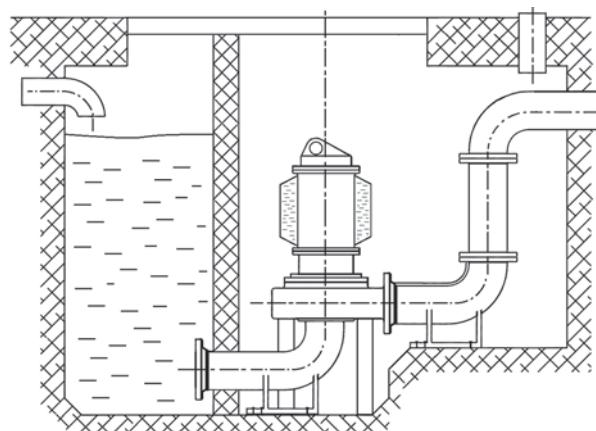

MOUNTING METHODS

Submersible mobile

Stationary submersible

Non-submersible («dry») stationary

PUMP SERIES DESIGNATION

Designation example:

SIDUS 4C-100/270-11-145N-G-S

Pump series

SIDUS 4C - 100 / 270 - 11 - 145N - G - S

Electric motor poles number:

- 2** – (3,000 rpm, 50 Hz) / (3,600 rpm, 60 Hz)
4 – (1,500 rpm, 50 Hz) / (1,800 rpm, 60 Hz)
6 – (1,000 rpm, 50 Hz) / (1,200 rpm, 60 Hz)
8 – (750 rpm, 50 Hz) / (900 rpm, 60 Hz)

Pump flow path:

- A** – semi open impeller
C – channel impeller
VT – free vortex impeller
OG – semi open impeller and flow path both rubberized

Discharge nozzle diameter, mm

Maximum impeller diameter, mm

Electric motor rated power, kW

Impeller type

Construction materials:

- G** – Grey cast iron; **S** – Stainless steel; **D** – Duplex steel

Installation:

- P** – mobile (without forced cooling)
F – mobile (with forced cooling)
S – stationary with a lifting device (without forced cooling)
K – stationary with a lifting device (with forced cooling)
V – stationary, non-submersible, vertical
H – stationary, non-submersible, horizontal

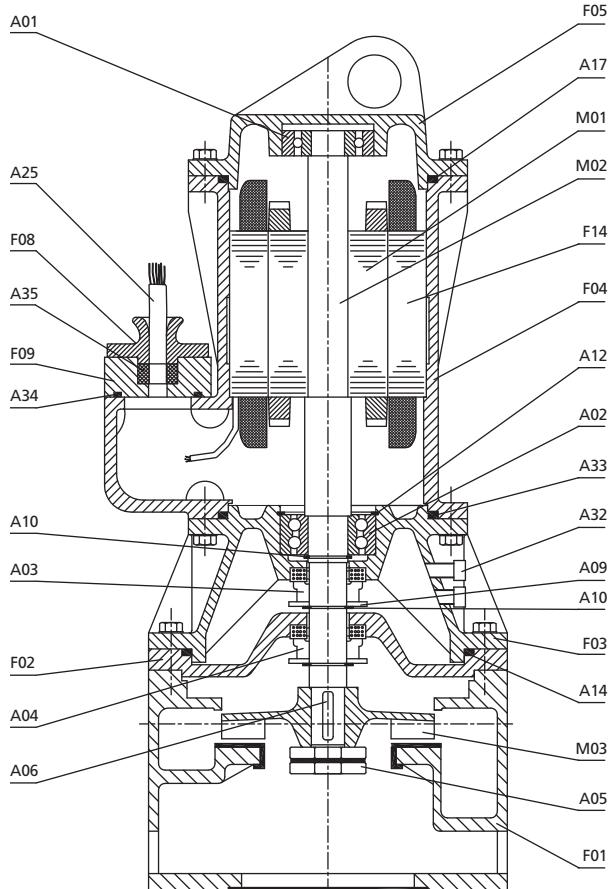

Electric Cables Application Depending on the Electric Motors Power

Power, kW	Rotation speed, rpm	Cable cross- section	Motor protection	Starting method	Voltage, V	Size
1.1-3	1,500 / 3,000	4x2.5	No protection	Direct-on-line	220 / 380	90 / 112

PERFORMANCE RANGE

Types 4C, 6C

Pumps with discharge nozzle diameter up to 125 mm

TECHNICAL DATA

— Capacity: up to 270 m³/h

— Head: up to 65 m

— Power: up to 55 kW

— Rotation speed: 960 / 1,450 rpm

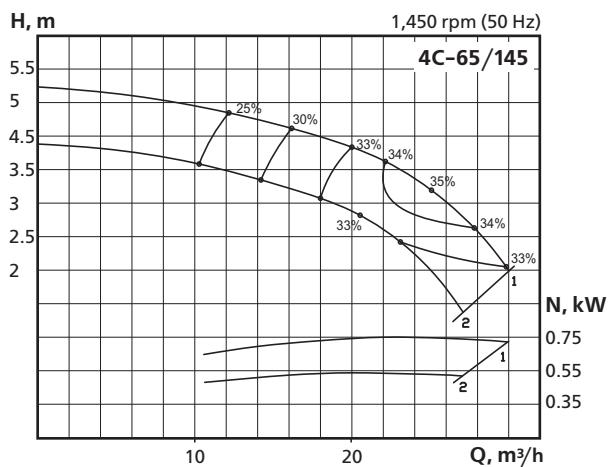

— Impeller type: channel

— Solids size: up to 80 mm

Types 2VT, 4VT

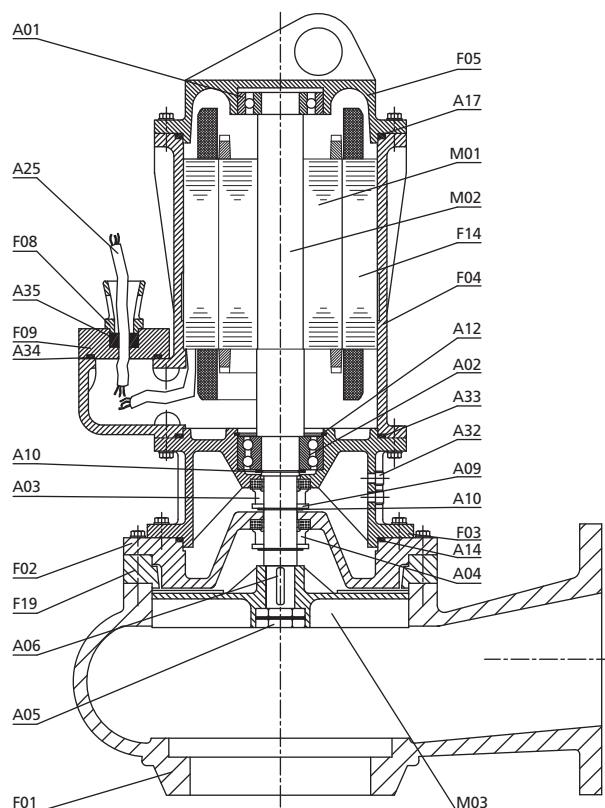

Pumps with discharge nozzle diameter up to 150 mm

CROSS-SECTION DRAWING

SIDUS Pumps Type 2VT (up to 3 kW),
SIDUS Pumps Type 4VT (up to 1.5 kW)

SIDUS Pumps Type 2VT (over 4 kW),
SIDUS Pumps Type 4VT (over 2,2 kW)

TECHNICAL DATA

— Capacity: up to 350 m³/h
 — Head: up to 50 m
 — Power: up to 22 kW

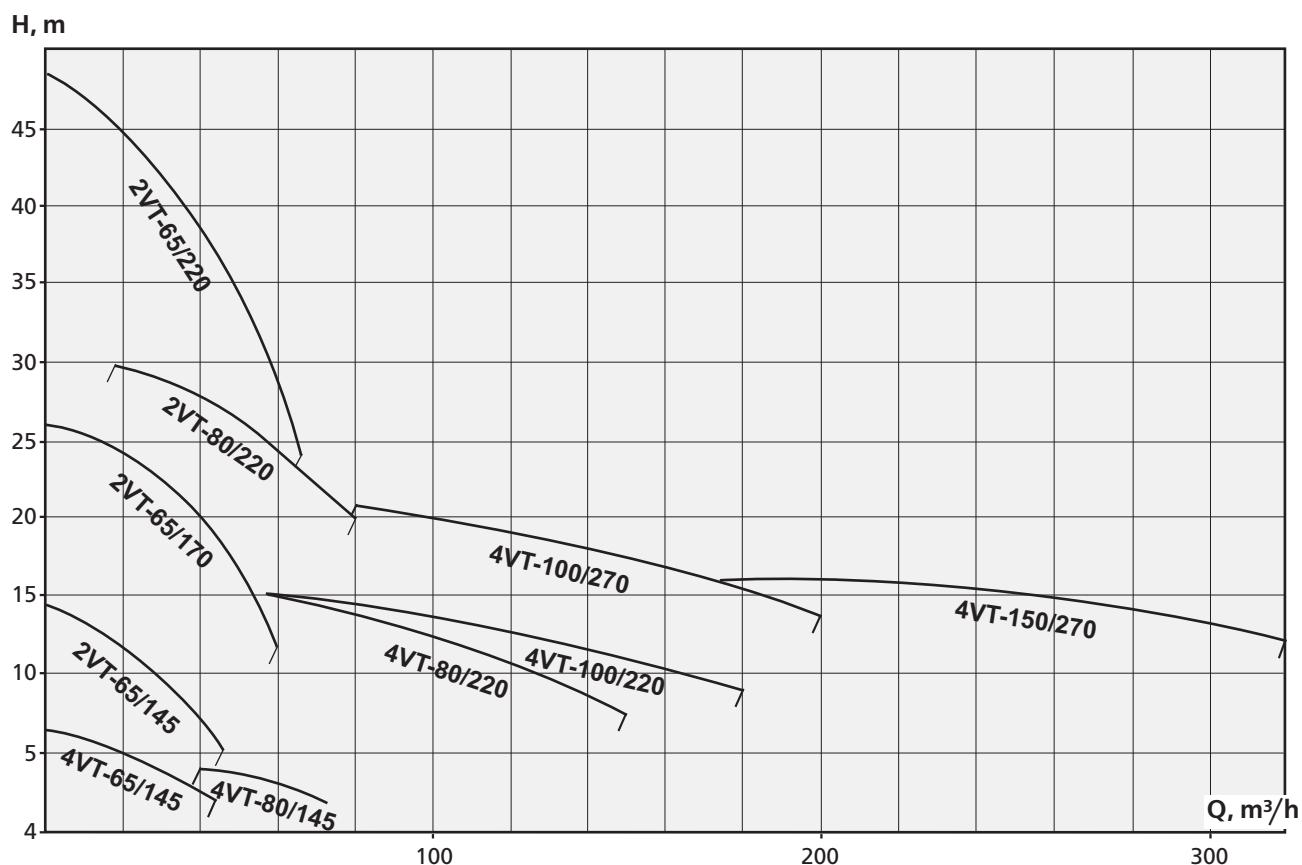

— Rotation speed: 1,450/2,900 rpm
 — Impeller type: vortex
 — Solids size: up to 120 mm

TECHNICAL DATA

— Impeller type: semi open
— Capacity: up to 450 m³/h
— Head: up to 26 m

— Power: up to 45 kW
— Rotation speed: 960 / 1,450 rpm
— Solids size: up to 10 mm

HMS Group – a leading international holding, integrating major machine building and engineering companies. Scope of HMS Group's activities covers oil & gas industry, nuclear and thermal energy, water supply & sewage disposal, and other industries.

- Company foundation: 1993
- Production facilities in Russia, CIS, and Germany
- Own engineering institutes and R&D centers
- 14,500 professional employees
- Considerable experience in integrated projects for various industries
- Branch and representative offices in Europe, CIS, Middle East and North Africa

HMS Group offers contemporary, reliable and energy-efficient solutions based on pumps and compressors for various industries: from equipment engineering, development and production to complex procurement and integrated turn-key projects.

ENGINEERING

Modern R&D base with years of experience is represented by the own engineering centers with centralized control, located in Russia and CIS.

The up-to-date 3D-modeling and CAD methods are applied for development new and modernization of existing equipment to ensure high efficiency and performance.

HMS Group engineers cooperate closely with clients' technical divisions, participating in equipment specifications development and adapting new technical solutions to clients' requirements.

MANUFACTURING

All critically important units and components are produced at the HMS Group plants, equipped with modern CNC machinery from the leading manufacturers.

The casing parts and impellers of pumps and compressors are manufactured at the own foundries, equipped with new efficient molding lines and induction furnaces.

TESTING

HMS Group plants are equipped with unique equipment for mechanical, thermal and research tests of the pump and compressor units under real operation conditions.

The tests are conducted in accordance with international standards, or by special methods developed jointly with the customer. Automated measurement systems ensure high accuracy of test results.

SERVICE

The HMS Group customers are provided with a full range of related services for pump and compressor systems including installation & commissioning supervision, routine maintenance, repair and overhaul, spare parts supply, integrated retrofit, extended engineering and technical support.

STANDARDS & QUALITY

The design and materials of manufactured pumps and compressors meet the requirements of the main international standards ISO, API, DIN EN, AISI, ANSI, NEMA.
